

**UPDATE ON MINING OPERATIONS AT RED METAL'S FARELLON COPPER-GOLD PROJECT**

**THUNDER BAY, ON and VALLENAR, CHILE, June 5, 2014** , Red Metal Resources Ltd. (OTCQB:RMES), a mineral exploration company with copper-gold assets in Chile, is pleased to provide an update on mining activities being conducted by Minera Farellon, an affiliated company, on the Farellon copper-gold project. Minera Farellon has a permit to mine up to 500 tonnes per month on the Farellon project.

Minera Farellon has provided Red Metal with an update on activities. Mining development has reached approximately 20 meters vertical depth. The main target is an area intersected in 2011 and 2013 drilling campaigns included intercepts in drill holes FAR-11-001 of 3.95% Cu and 0.53 g/t Au over 8 meters, FAR-13-002 of 2.15% Cu and 0.28 g/t Au over 7 meters and FAR-13-001 of 0.70% Cu and 0.20 g/t Au over 6 meters including 1.25% Cu and 0.34 g/t Au over 2 meters (see news releases Sept 21, 2011 and Jan 24, 2014) The target area is at 35 meters vertical depth from surface. During mining development the vein zone has been intersected several times and ore material has been removed and sold to ENAMI, a Chilean national mining company with regional ore processing plants. A royalty of 10% of ENAMI payments will be paid to Red Metal. Results of these shipments are listed below.

<b>Tonnes</b>	<b>% Cu Soluble</b>
42.13	1.79
99.48	1.56
150.11	1.32
38.46	1.35

Once Minera Farellon reaches the target depth their goal is to sell 500 tonnes per month to ENAMI. Red Metal will direct sampling procedures to ensure we are maximizing the information recovery from the mining operations and we will get access to all results of the mining. If results are positive, Red Metal will begin the process of increasing permitting to 2,500 tonnes per month and Minera Farellon will then be contracted to complete mining activities for Red Metal Resources.

The Farellon property consists of six mining and exploration concessions totaling 753 hectares in the Carrizal Alto mining district located approximately 75 kilometers northwest of the city of Vallenar, 150 kilometers south of Copiapo and 20 kilometers west of the Pan American Highway. The property is easily accessible year round by dirt roads that crisscross the property and is located close to power, water and a major urban center, Copiapo, with a readily available mining workforce

Caitlin Jeffs, P.Geo., President & CEO of Red Metal stated, “ we are excited to see development progressing on the Farellon project. For Red Metal we are gaining valuable information about the nature of the vein system that will aide in future exploration programs.”

Caitlin Jeffs, P. Geo., President & CEO of Red Metal, the project's Qualified Person as defined in NI 43-101, has reviewed and approved the contents of this news release.
