REDMETAL RESOURCES

EXPLORING FOR COPPER AND GOLD IN CHILE

KNOWLEDGABLE AND EXPERIENCED MANAGEMENT

Caitlin Jeffs, P.Geo.

Director, President, CEO

- Previously with Placer Dome and Goldcorp working in advanced exploration and property evaluation
- Specialist in GIS and orebody modeling for resource calculations

Michael Thompson, P.Geo.

Director, VP Exploration

- 12 years experience including 10 years with Teck Cominco and Placer Dome in property evaluation and mine site exploration
- Specialist in structural geology

John Da Costa, CFO

- 20 years of accounting experience with Canadian public companies, 8 years with US public companies and 2 years with Chilean subsidiaries

Kevin Mitchell

Operations Manager, Chile

- Worked in underground contract mining across Canada through the early 1980s
- Formed Can-Am Mining Equipment in the mid 1980s to provide quality, rebuilt mining equipment to the mining community in Canada, Peru and Chile and now provides a wide range of services to the mining and exploration sector in Chile

Harry Floyd

Consulting Geologist, Chile

- British consulting geologist with more than 20 years experience working in the Chilean mining exploration industry, mostly in the III Region

Red Metal Resources Ltd. (RMES) is an aggressive exploration company focused on growth through acquiring, exploring and developing copper-gold assets in Chile. Chile is famous for world-class, low-grade, high-tonnage deposits and possesses massive potential in undeveloped mid-sized, high-grade, copper-gold deposits. Chile has consistently been ranked as one of the most politically stable countries in which to invest., contains excellent infrastructure and possesses a mining-educated workforce. Our properties are all located in the highly prospective Candelaria iron oxide copper-gold belt of Chile's coastal Cordillera. The Candelaria belt is host to Freeport McMoran's Candelaria Mine and Anglo American's Manto Verde Mine. Red Metal has assembled a team with strong geological and management experience in Chile.

PROJECTS

FARELLON

100% Ownership
Candelaria IOCG Belt, Chile
Copper-Gold-Cobalt project

- Advanced exploration project acquired by RMES in 2008
- Previously Explored in 1997: 23 RC drill holes totalling 3900 metres along a 1.7 km strike length and 150 metres depth
- Reasonable expectation of mineralization to 500 metres depth
- Dec 2009—Announced results of a 5 hole, 725 metre, reverse circulation drill program
- Highlights include 2.57% copper and 4.16 g/t gold over 5 metres
- Feb 2010—NI 43-101 compliant technical report completed by Micon International Ltd.

MATEO

100% Ownership
Candelaria IOCG Belt, Chile
Copper-Silver-Gold project

- 2200 hectares covering ground in the same belt and formation as Freeport McMoran's Candelaria mine
- Explored by ENAMI, the Chilean national mining company, in 1994
- Mining results from 1994-1997 by ENAMI show 16,000 tonnes mined grading an average of 3.15% copper, 45.2 g/t silver and .74 g/t gold
- Non NI 43-101 compliant inferred resource by ENAMI from 1994 of 68,000 tonnes grading 3.6% copper, 78 g/t silver and 0.7 g/t gold
